

How to complete your passenger assistant data

Excel and document folder instructions

Thank you. This pack is the format we use to add your passenger assistants (PAs) to the system. You do not enter them on the website. Fill the Excel, add the documents in the folders, and send both back to us.

What you have received

- PAs.xlsx — one row per passenger assistant. Four example PAs are already filled so you can see the format.
- documents/pas/ — one folder per PA. The folder name is that PA's email address.
- This instruction PDF.

Please delete the four example PAs (Aisha, Nora, Tom and Lucia) before you send the pack back, including their folders. They are only examples of how to fill the form.

How to fill PAs.xlsx

Open the PAs sheet.

- Do not change or delete the header row (row 1).
- One passenger assistant = one row. Add as many rows as you need.
- Copy the company_id value from an example row onto every new row. Do not change that number.
- Copy the documents_folder pattern. It must match the PA's email, for example:
documents/pas/jane.doe@gmail.com

There is also a Required_Documents sheet that lists every file we need.

Required information (every PA)

These columns must be filled for every passenger assistant.

Column	What to enter
first_name	First name
last_name	Last name / surname
email	Unique login email the PA can use, e.g. name@gmail.com. No two PAs can share an email.
phone	Full number with country code, e.g. +447700900301
password	Login password, at least 6 characters. You may use one shared temporary password for everyone.
residential_address	Full home address
emergency_contact_name	Emergency contact's name
emergency_contact_phone	Emergency contact's phone, with country code

Column	What to enter
nationality	e.g. British, Pakistani, Portuguese
safeguarding_expiry	Safeguarding certificate expiry date

Dates — follow this exactly

Safeguarding expiry must be written as YYYY-MM-DD.

Accepted	Not accepted
2027-06-15	15/06/2027
2027-11-01	15-06-2027
2027-01-20	June 2027 or 15 Jun 27

Use the PA's real expiry date. Do not copy the sample dates.

British vs other nationality

This rule is important and is often missed.

If the PA is...	nationality	right_to_work_code
British	Type British	Leave this empty
Not British	Type their nationality, e.g. Pakistani	You must fill this. We cannot add the PA without it.

Passport (optional)

Passport is not required for every PA. The number and the document must always go together.

If you add a passport number, you must also add the passport document.

Leave passport_number empty if there is no passport, and do not add a passport file. If you enter a passport_number, put a file named passport.png (or passport.jpg / passport.pdf) in that PA's folder. Do not send a number without the file, and do not send a file without the number.

Document folders

Create one folder per PA inside documents/pas/. The folder name must be the same email as in the Excel, all lowercase, with no extra spaces.

Excel email	Correct folder name
jane.doe@gmail.com	documents/pas/jane.doe@gmail.com/

Wrong examples: a folder named Jane Doe, a folder named jane.doe, or an Excel email of Jane.Doe@gmail.com with a folder named jane.doe@gmail.com. The email and folder name must match exactly.

Put that PA's files inside their own folder only. Do not put all documents in one shared folder.

Required documents (every PA)

Every PA must have a profile photo and these 3 documents. Replace the tiny example images with the real photos or PDFs. Keep the file name exactly as shown. You may only change the ending to .png, .jpg, .jpeg or .pdf.

Document	Exact file name	Matching Excel expiry column
Profile photo	profile.png	—
Safeguarding Certificate	safeguarding_certificate.png	safeguarding_expiry
Background Check Certificate	background_check.png	—
First Aid Certification	first_aid_certificate.png	—
Passport (only if number is filled)	passport.png	—

Do not use names like safeguarding.jpg or First Aid.pdf. In the Excel, leave the document columns as those file names (already filled in the examples) and copy them onto each new row.

The four example rows

Look at these, then delete them before you send the pack back.

Example	What it shows
Aisha Khan	British, no Right to Work, no passport
Nora Ahmed	Not British, Right to Work filled, passport number and passport.png
Tom Baker	British, no passport
Lucia Costa	Not British, Right to Work filled, no passport

All four examples also include the profile photo and the 3 required documents.

Checklist before you send

- Example rows and example folders removed.
- One Excel row per real passenger assistant.
- company_id copied onto every row and left unchanged.
- Every email is unique and is a real address the PA can use.
- Folder name is exactly that PA's email.
- Every PA has a profile photo plus safeguarding, background check and first aid files.
- safeguarding_expiry is filled, format YYYY-MM-DD.
- British PAs: nationality is British, Right to Work left empty.
- Non-British PAs: nationality and Right to Work code both filled.

- If passport number is filled, passport.png (or jpg/pdf) is in that folder.
- If there is no passport number, there is no passport file.

If anything is missing, we will send back a list of which row, which field, or which file needs to be completed. If you are unsure about one PA, still send the others. We can add incomplete PAs later once the missing item is provided.
