

How to complete your passenger data

Excel instructions

Thank you. This pack is the format we use to add your passengers to the system. You do not enter passengers on the website. Fill the Excel and send it back to us. Passengers do not have login accounts and there is no document folder.

What you have received

- Passengers.xlsx — one row per passenger. Four example passengers are already filled so you can see the format.
- This instruction PDF.

Please delete the four example passengers (Oliver, Amelia, Noah and Isla) before you send the pack back. They are only examples of how to fill the form.

How to fill Passengers.xlsx

Open the Passengers sheet.

- Do not change or delete the header row (row 1).
- One passenger = one row. Add as many rows as you need.
- Copy the company_id value from an example row onto every new row. Do not change that number.

Required information (every passenger)

These columns must be filled for every passenger.

Column	What to enter
first_name	First name
last_name	Surname
email	Unique email, e.g. name@gmail.com. No two passengers can share an email.
contact_number_1	Main phone, with country code, e.g. +447700900501
primary_pickup_address	Home / pickup address
primary_pickup_postcode	Pickup postcode
primary_pickup_latitude	Pickup latitude (number)
primary_pickup_longitude	Pickup longitude (number)
pickup_time	Pickup time as HH:MM, e.g. 07:30
educational_site_address	School / site address
educational_site_postcode	School / site postcode
educational_site_latitude	School latitude (number)

Column	What to enter
educational_site_longitude	School longitude (number)
dropoff_time	Drop-off time as HH:MM, e.g. 15:15
wheelchair_required	Yes or No
harness_required	Yes or No

Weekly schedule

At least one day must be Yes. Use Yes or No in these columns: schedule_mon, schedule_tue, schedule_wed, schedule_thu, schedule_fri, schedule_sat, schedule_sun.

Times

pickup_time and dropoff_time must be HH:MM.

Accepted	Not accepted
07:30	7.30
15:15	3:15 PM
08:00	8am

Latitude and longitude — required

Every passenger must have coordinates for the primary pickup and the educational site. These go onto the passenger record so the map and routing can work.

Location	Latitude column	Longitude column
Primary pickup	primary_pickup_latitude	primary_pickup_longitude
Educational site	educational_site_latitude	educational_site_longitude

Do not leave pickup or school lat/long empty.

Use decimal numbers, for example 53.4812829 and -2.2472267. You can copy these from Google Maps (right-click the pin). Do not use degrees/minutes, and do not swap latitude with longitude.

Secondary pickup and respite (optional)

These are optional extra locations. If you use one, you must fill address, postcode, latitude and longitude together. If you do not use it, leave all four columns empty.

If using...	Fill all of these
Secondary pickup	secondary_pickup_address, secondary_pickup_postcode, secondary_pickup_latitude, secondary_pickup_longitude

If using...	Fill all of these
Respite	respice_address, respice_postcode, respice_latitude, respice_longitude

Do not send an extra address without coordinates, and do not send coordinates without the address and postcode.

Optional columns

Column	What to enter
contact_number_2	Second phone number, or leave empty
notes	Any extra notes, or leave empty

The four example rows

Look at these, then delete them before you send the pack back.

Example	What it shows
Oliver Wright	Weekdays, no wheelchair, no harness
Amelia Hughes	Wheelchair required
Noah Patel	Harness required, Mon/Wed/Fri
Isla Bennett	Secondary pickup + respite, includes Saturday

All four examples include primary and educational lat/long. Isla also shows how to fill secondary pickup and respite with coordinates.

Checklist before you send

- Example rows removed.
- One Excel row per real passenger.
- company_id copied onto every row and left unchanged.
- Every email is unique.
- Pickup and drop-off times are HH:MM.
- At least one schedule day is Yes.
- wheelchair_required and harness_required are Yes or No.
- Primary pickup has address, postcode, latitude and longitude.
- Educational site has address, postcode, latitude and longitude.
- If secondary pickup is used, all four secondary columns are filled.
- If respite is used, all four respite columns are filled.

If anything is missing, we will send back a list of which row and which field needs to be completed. If you are unsure about one passenger, still send the others. We can add incomplete passengers later once the missing item is provided.
